True/False

3. There are three main models that have influenced modern thinking about disability: the Medical Model, Functional Model, and the Social Model.

True/False

Module 2 Quiz Answer Key

1. The World Health Organization's (WHO) framework for measuring health and disability at both individual and population levels is

A. The International Classification of Functioning (ICF)

B. Healthy People 2020

C. Behavioral Risk Factor Surveillance System (BRFSS)

2. Over 60 various definitions of "disability" have been generated for legislative and policy uses.

True

3. There are three main models that have influenced modern thinking about disability: the Medical Model, Functional Model, and the Social Model.

True

Module 3 - Quiz Questions

1. There are surveillance systems that monitor the health and behaviors of people with disabilities and a useful source of disability related data.

True/False

2. Disability and Health Data System (DHDS) is an online source of state-level data on adults with disabilities.

True/False

3. One commonly used surveillance system is the Behavioral Risk Factor Surveillance System (BRFSS).

True/False

Module 3 - Quiz Answer Key

1. There are surveillance systems that monitor the health and behaviors of people with disabilities and a useful source of disability related data.

True

2. Disability and Health Data System (DHDS) is an online source of state-level data on adults with disabilities.

True

3. One commonly used surveillance system is the Behavioral Risk Factor Surveillance System (BRFSS).

True

Module 4 - Quiz Questions

1. People with disabilities experience barriers to access health services.

True/False

2. People with disabilities do not experience more chronic health problems than the general population.

True/False

3. People living with a disability remains a largely unaddressed population in public health.

True/False

Module 4 – Quiz Answer Key

1. People with disabilities experience barriers to access health services.

True

2. People with disabilities do not experience more chronic health problems than the general population.

False

3. People living with a disability remains a largely unaddressed population in public health.

True

Module 5- Quiz Questions

1. People with disabilities do not experience more chronic health problems than people without disabilities.

True/False

2. Housing is an emerging issues for people with disabilities.

True/False

3. There is a direct relationship between how the environment where people live, work and recreate in affects their physical and mental health outcomes.

True/False

Module 5- Quiz Answer Key

1. People with disabilities do not experience more chronic health problems than people without disabilities.

False

2. Housing is an emerging issues for people with disabilities.

True

3. There is a direct relationship between how the environment where people live, work and recreate in affects their physical and mental health outcomes.

True
